VT Hackney Releases ColdSled Commercial Cooler *Mobile Pre-Chilled Transport for Dry Fleets*

Washington, NC, September 20, 2016 – VT Hackney, Inc. is tackling the demand for pre-chilled transport by releasing the ColdSled commercial cooler. Through its Kidron and Hackney brands, VT Hackney touches a variety of markets, such as foodservice and beverage, that require temperature control management during daily delivery. The ColdSled is designed to be mobile allowing operators the flexibility to allocate to specific routes that require cold chain transport, while utilizing their current dry body fleet.

The ColdSled is a commercial grade cooler designed to take on the rigors of daily loading and unloading. It features a durable aluminum structure with 3 inches of foam insulation for maximum thermal efficiency. Most notably, it has a built in pallet that can accept forklifts or pallet jacks allowing it to be mobile and utilized on a variety of truck styles, including box trucks, trailers, step vans, and side loaders.

The ColdSled is a perfect match for pre-chilled keg, beverage, and produce items that require a level of temperature control on typical delivery routes. Custom sizes are available along with various options including shelving and external e-track for securing to internal body side walls.

Additional ColdSled sales and product information can be found at www.vthackneyparts.com.
